DAÑO HEPÁTICO POR ALCOHOL

Protective effect of some vitamins against the toxic action of ethanol

Efecto protector de algunas vitaminas del daño tóxico por alcohol.

“

Nombre del tema: Daño hepático por alcohol

Dentro del programa de la Licenciatura en Farmacia se imparte la materia de Fisiopatología, como parte del programa de esta materia se imparte el tema de cirrosis hepática, siendo el consumo de alcohol la causa de daño por etanol.

Los alumnos obtienen el conocimiento de la fisiopatología de la cirrosis por el consumo del alcohol.

Abstract

Acute ethanol administration partially inhibits DNA and protein syntheses during liver regeneration (LR) induced by partial hepatectomy (PH) in rats. Previous findings that the magnitude of ethanol's deleterious effects on LR are related to the route and timing of its administration led us to perform studies at the ultrastructural level, comparing ethanol effects on PH-induced LR, as a consequence of its administration route. PH promoted alterations on the endoplasmic reticulum and mitochondria, accompanied by decreased glycogen and increased lipid content in cytoplasm. Structural nuclear and nucleolar activities were also evident. Intraoperative ethanol administration practically abolished the adaptative changes found in PH-promoted regenerating hepatocytes, whereas its administration through the intraperitoneal route induced later ultrastructural modifications, indicating cellular proliferation. These results suggest that ethanol, under certain conditions, could stimulate liver proliferation triggered by PH. The mechanism underlying this surprising effect of ethanol on LR remains to be elucidated. However, it is suggested that an altered ethanol metabolism by rats subjected to PH could be involved.

KEY WORDS: alcohol; cirrosis; ethanol metabolism.

**Este es el vino que se llama octli,
que es raíz y principio de todo mal y toda perdición
porque este octli y esta borrachería
es causa de toda discordia y distensión
y de todas las revueltas
y desasosiegos de los pueblos y reinos
es como un torbellino que todo lo revuelve y
desbarata
es como una tempestad infernal
que trae consigo todos los males juntos**

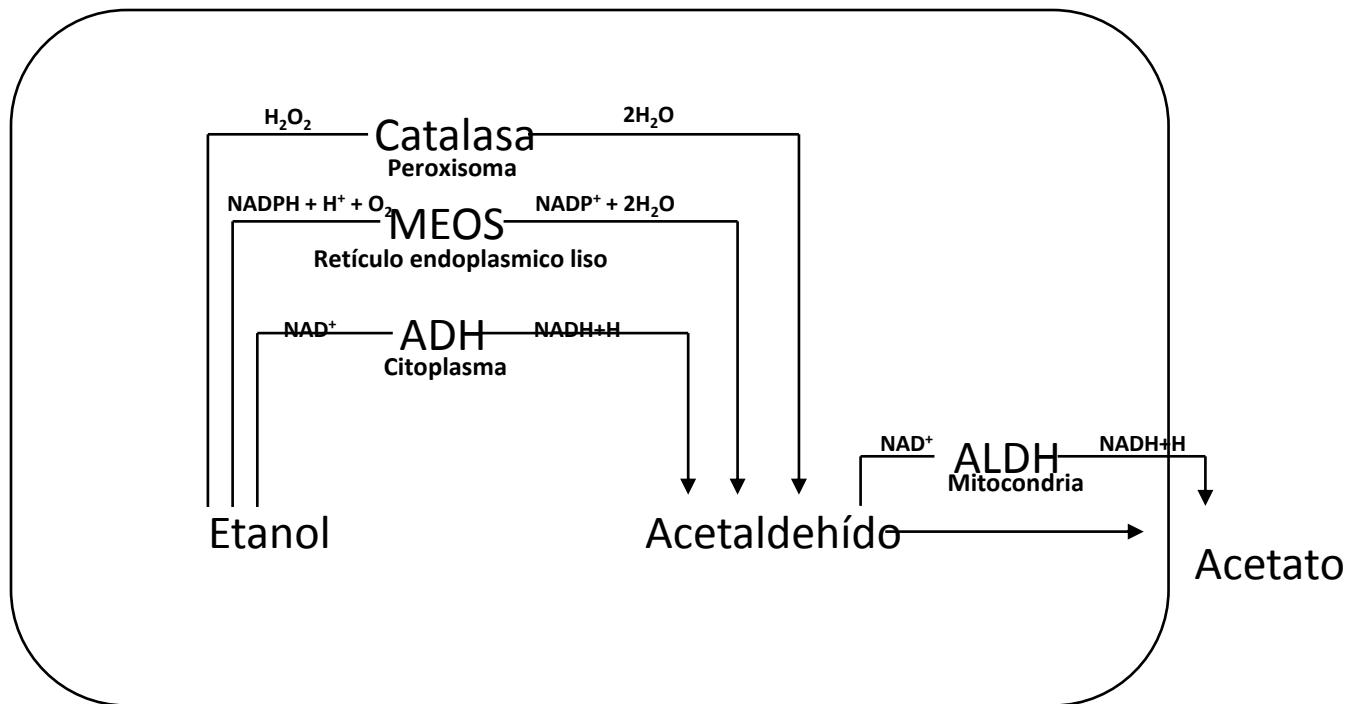

Fragmento del discurso con el cual los Emperadores Aztecas, se dirigían a su pueblo inmediatamente después de su elección. (Sahagún: Historia General de las cosa de la Nueva España)

¿Qué es la vida a quien le falta el vino que
ha sido creado para contento de los hombres?

Regocijo del corazón y contento del alma
es el vino bebido a tiempo y con medida

Origen	Acción
Exógenos	
Vitamina E	Neutraliza el oxígeno singulete
Vitamina C	Captura radicales libres hidroxilo
β -carotenos	Captura O_2
Flavonoides, licopenos	Neutraliza peróxidos
	Neutraliza el oxígeno singulete
	Captura radicales libres hidroxilo
	Captura O_2
Endógenos enzimáticos	
Superóxido dismutasa (SOD)	Regenera la forma oxidada de la vitamina E
Catalasa (Cat)	Neutraliza el oxígeno singulete
Glutatión peroxidasa (GPx)	
No enzimáticos	
Glutatión	Cofactor
Coenzima Q	Cobre, sodio, manganeso
Ácido tiocálico	Hierro
	Selenio
	Barreras fisiológicas que enfrenta el oxígeno a su paso desde el aire hasta las células
	Transportadores de materiales (transferrina y ceruplasmina)

Full Length Research Paper

Hepatoprotective effects of glycine and vitamin E, during the early phase of liver regeneration in the rat

Judith Parra-Vizuet¹, Abelardo Camacho-Luis¹, Eduardo Madrigal-Santillan¹, Mirandeli Bautista¹, Jaime Esquivel-Soto², Cesar Esquivel-Chirino², Manuel García Luna y González Rubio², Jorge Alberto Mendoza-Pérez³, Jorge Chanona-Pérez³ and José A. Morales-González^{1*}

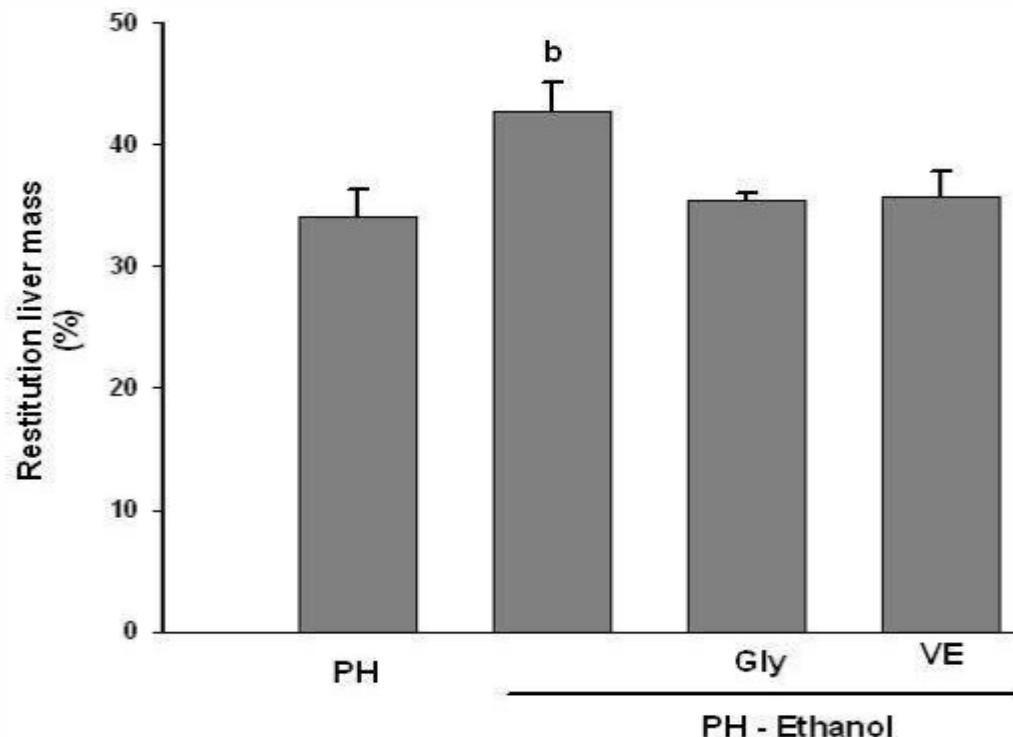

Figure 1. Effect of glycine and vitamin E on the percentage of liver-weight restitution of in rats from all ethanol-treated groups treated after partial hepatectomy. Values are means \pm standard error of mean (SE) ($n = 10$). Restitution liver mass was expressed as %. ^bP < 0.05 vs. the hepatectomized group (PH). PH: partial hepatectomy; Gly: glycine; VE: vitamin E.

Table 1. Albumin, bilirubin and cholesterol levels on serum from rats after of partial hepatectomy (PH) and a single administration of ethanol and application of vitamin E or Glycine.

Group	Albumin (g/dL)	Bilirubin (mg/dL)	Cholesterol (mg/dL)
Sham	3.46 ± 0.2	0.29 ± 0.2	51.8 ± 4.3
PH	3.12 ± 0.5	0.28 ± 0.1	48.0 ± 6.3
PH-EtOH	2.27 ± 0.11 ^a	0.19 ± 0.09	31.4 ± 2.1 ^a
PH-EtOH-Gly	3.56 ± 0.11 ^c	0.08 ± 0.04	51.1 ± 3.7 ^c
PH-EtOH-VE	3.39 ± 0.04 ^c	0.08 ± 0 ^c	59.1 ± 8.1 ^c

Values are the mean ± SE for each experimental group (n = 10) as it corresponds. PH: partial hepatectomy; Gly: glycine; VE: vitamin E; Sham: controls group. ^aP < 0.05 vs the sham group; ^cP < 0.05 vs hepatectomized + ethanol group

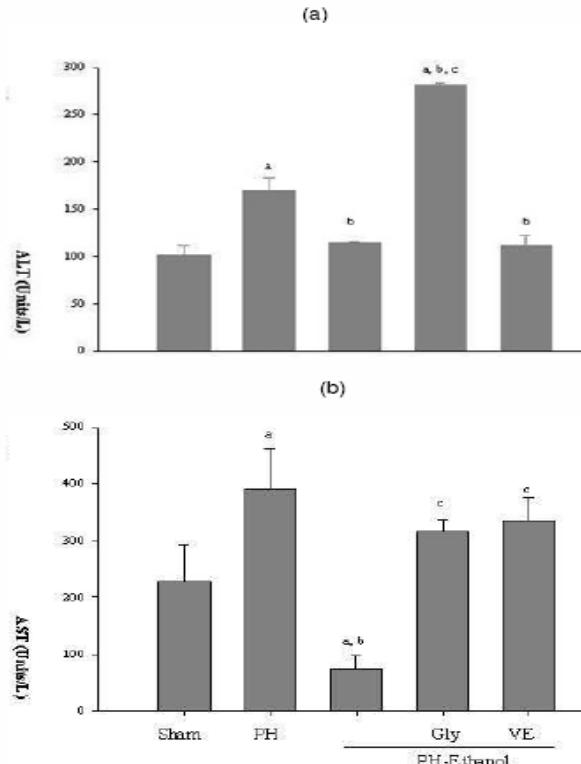

Figure 2. Effect of glycine and vitamin E on specific activities of serum alanine aminotransferase (ALT, panel A) and aspartate aminotransferase (AST, panel B) during liver regeneration and ethanol intoxication. Values are means \pm Standard error of mean (SE) ($n = 10$). The activity is reported in Units/L. ^aP < 0.05 vs. the sham group (sham); ^bP < 0.05 vs. the hepatectomized group (PH); ^cP < 0.05 vs. hepatectomized + ethanol group (PH-EtOH). PH: Partial hepatectomy; Gly: Glycine; VE: Vitamin E.

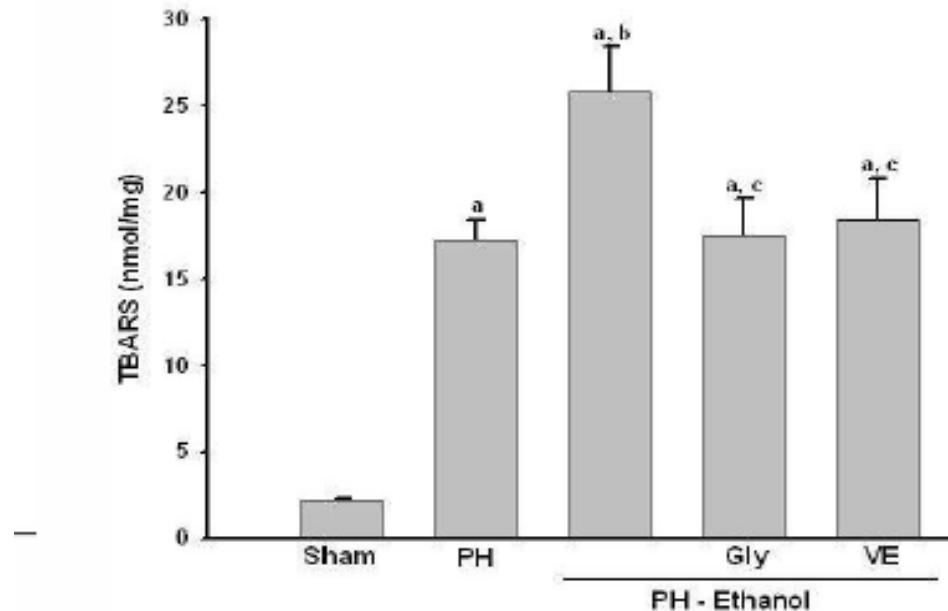

Figure 3. Effect of glycine and vitamin E on hepatic lipid peroxidation (determined as Thiobarbituric Acid Reactive Substances (TBARS) content) in all ethanol-treated groups during liver regeneration. Values are means \pm Standard error of means (SE) ($n = 10$). TBARS content is reported in nmol/mg. ^aP < 0.05 vs. the sham group (sham); ^bP < 0.05 vs. the hepatectomized group (PH); ^cP < 0.05 vs. the hepatectomized + ethanol group (PH-EtOH). PH: Partial hepatectomy; Gly: Glycine; VE: Vitamin E.

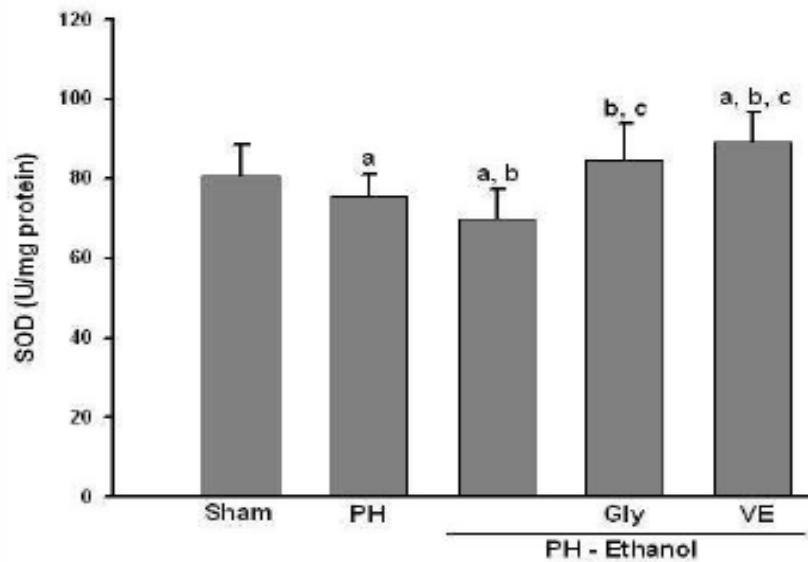

Figure 4. Effect of glycine and vitamin E on (SOD) activity in liver from all ethanol-treated groups during liver regeneration. Values are means \pm Standard error of mean (SE) ($n = 10$). SOD activity was expressed as U/mg protein. ^aP < 0.05 vs. the sham group (sham); ^bP < 0.05 vs. the hepatectomized group (PH); ^cP < 0.05 vs. hepatectomized + ethanol group (PH-EtOH). PH: Partial hepatectomy; Gly: Glycine; VE: Vitamin E.
