Licenciatura en Gestión Tecnológica
Materia: Eventos Pasados y Futuros,
Lengua Extranjera

Tema: Cuidado del Medio Ambiente
(Presente Continuo)

2do Semestre

Enero-Junio 2018

Profesor: L.E.L.I Irene Campos González

Abstract:

People should be conscious about the importance of taking care the environment, the meditation about the actions that we are doing to contribute in the change and protection of the planet are significant.

Key Words:

Environment, Taking Care, change, actions

Do you know this words?

Pollute

Reduce

Forest
Down

Cut

Consumption

Environment
Heater

Water

Factory

Solar Panel
Light Bulbs

Energy Saving

Solar Water Heater

Energy Saving Light
Bulbs

Recycling Bin

Recycling Bag

Reading

Instructions: Read the article about the changing planet and answer the questions that are in the reading

OUR FUTURE ON THIS **CHANGING PLANET**

Planet Earth is changing, and the changes are seriously affecting us – you and me. And we humans are partly responsible for the changes. We are polluting the air, the water and the land, contaminating them with chemicals and waste. We are cutting down forests and jungles, and covering large areas with roads, buildings and concrete. We are contributing to the extinction of flora and fauna. Can you see negative changes like these in your part of the world? 

We can change our impact on our planet. Environmental scientists and engineers are developing ways to satisfy human needs and reduce or eliminate negative impact. It is possible to reduce the emissions of factories and vehicles enormously. It is possible to clean and reuse most industrial and domestic water. Energy-saving light bulbs, solar water heaters, solar panels and other technology can reduce our need for polluting electric power plants. But people in general must demand and use these green options. Are you demanding them? Are you using any of these green options? 

Making these positive changes is vital and urgent, for our planet and for us. Earth's future is our future. What will the future be like? We see images of possible futures in science fiction movies. Do you know a single movie or book that presents a future with a healthy planet Earth and happy humans on it? 

Some of us will live in the *real* future 50 or more years from now. Our children and grandchildren will live long after that. Are you doing your part now to create a good future for yourself and for them? 

Actions

She **is using** a solar water heater.

We **are reusing** paper from the office.

The school **is collecting** the plastic bottles.

We are using Energy Saving Light Bulbs at home

Present Continuous

We use the present continuous tense to talk about the present:

- for something that is happening **at the moment of speaking**
- or something which is happening before and after a given **time**

The children **are sleeping**

When I get home the children **are doing** their homework.
